To Whom It May Concern:

BG Products, Inc. produces and markets chemicals, lubricants, fuel products, and services for the automotive, commercial, and fleet industries in the United States and abroad. BG Products, Inc., holds ISO 9001, ISO 14001, ISO 17025, and ISO 45001 certifications. All our products are professionally tested, safe for use, and compatible with existing automotive technology components and equipment.

By way of this letter, we affirm that BG EPR™ Engine Performance Restoration®, PN 109, is an effective “oil based” engine cleaner. It is used in conjunction with engine oil “drain and change” procedures. It will safely dissolve engine deposits to improve piston ring function, restore lost compression, and clean internal surfaces, thus improving oil flow.

When used as directed BG EPR™ will not leave any harmful residue nor negatively affect any internal engine component, including vehicles equipped with timing-belt-in-oil (TBIO) or ‘wet belt’ systems.

BG EPR™ is compatible with all engine gaskets, elastomers, belts, and other internal crankcase components.

BG Advanced Formula MOA® part no. 115, is a proprietary blend of synthetic ingredients that fortify and improve new oil performance. It specifically increases resistance to oxidation, improves wear protection and promotes engine cleanliness. It is safe for use in all gasoline engines and is compatible with existing engine technology.

BG DOC Diesel Oil Conditioner, part no. 112 is a safe and effective diesel engine oil fortifier. It provides improved oxidation stability, enhanced soot dispersal, viscosity control, acid reduction, and improved detergency. It is safe for use in all diesel engines, and is compatible with existing engine technology.

Sincerely,

Michael D. Belluomo
Technical Product Manager
